

ENHANCED BATTLE RIFLE

Chassis Stock System

Close Quarter Battle (CQB) Variant

The Enhanced Battle Rifle Chassis Stock System (B009044) CQB Variant shown above is equipped with a M1A rifle mounting a 16" barrel, optional Stripper Clip Sight Base (B009042) and Adaptor, Picatinny Rail Section (B009047)

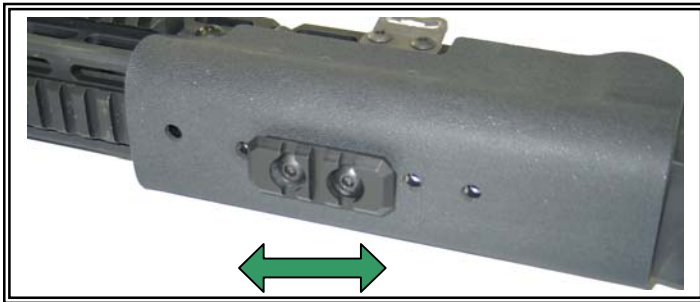

- Utilizes standard M16/M4 Mil-Spec receiver extension tube
- Accepts virtually all aftermarket movable butt stock to include: Colt, Lewis Machine, Vltor and numerous others
- The telescoping butt stock assembly component of the CQB Variant Chassis Stock System bolts directly to all current EBR Chassis (B009039 & B009044)

The EBR CQB Variant Stock shown above is **as delivered with the receiver extension tube only**. The large number of aftermarket butt assemblies available makes it impossible to stock all possible options.

Adaptor, 1913 Picitanny Rail Section

- Movable forward and aft four (4) positions
- Fits same hole pattern as the Sage Vertical Fore-Grip (B009039)
- Mountable on both B009039 and B009044 EBR Chassis Stock Systems

- Adaptor, Picitanny Rail Section accepts SOPMOD components already in the system
- Easily removed when not in use
- Compatible with most 1913 Picitanny Rail mounted equipment
